

Awning Window

Awning Window

A perennial favourite, the awning window complements any home. The elegance of the uninterrupted pane of glass combines superbly with the sturdy frame, making the awning suitable for almost all conditions.

Awning windows come with a smooth chain operated winder to enable you to regulate ventilation – even when it's raining.

If security is a concern, the fully enclosed chain winder resists jemmying, shuts securely and is available with the option of a keyed lock.

Awning windows are hinged from the top which allows the window to provide ventilation even during rain.
