ABN 78 004 213 692

With a strong substantial frame, the spacesaver™ is sturdy and avoids any tendency to flex as the panels glide back and forth.

The spacesaver™ wardrobe door panels incorporate heavy duty, concealed acetal resin rollers for effortless and silent operation. They are easily adjustable at installation to ensure smooth ongoing operation.

The wardrobe can also be installed with or without side frames. Speak to your local dealer to confirm which suits your home best.

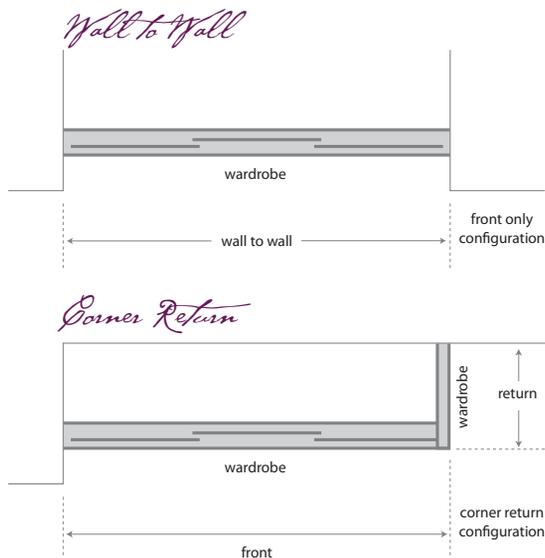

And with an integrated contoured sill, dust is kept away from the rollers, which provides for trouble free, low maintenance operation, day after day.

Wide, full length finger grips allow you to open and close your wardrobe door with ease, and help you to avoid touching your mirror or infill panel, which leaves unsightly finger prints.

Choose from the option of safety mirrors (in compliance with AS1288-2006) or from a wide range of plasterboard or solid infill panels that will suit your home décor requirements. Safety mirrors create a lighter and more spacious feel to your room, whilst infill panels are designed to match your room's walls or add a feature to your room.

The aluminium frame comes in a wide range of anodised or powder coat colours to suit your home décor requirements.

The wardrobe is available in two, three and four panel configurations on a double track sill to suit the size requirements of your wardrobe. The spacesaver™ wardrobe doors can be installed wall to wall or corner return. See diagrams below.

Contact your spacesaver™ dealer for wardrobe options or further information.

## Features include:

The raised legs on the bottom track allow the rollers to be recessed.

Rubber bumpers installed for quiet operation

Acetal resin rollers for smooth operation
